

Chief Scientific Officer

We are looking for a Chief Scientific Officer (CSO) to provide sound technical leadership in all aspects of our business.

You will communicate with employees, stakeholders and partners to set our technological goals and paths.

Strategic thinking and a very energetic approach are essential. You should be able to see the big picture and to lead a peaceful and efficient research.

If you are also a passionate fast learner with a profound understanding in inorganic chemistry and electro chemistry we would like to meet you.

Responsibilities

Lead the company's scientific path to reach higher TRL while monitoring and evaluating alternative technologies. Discover and implement new technologies that yield competitive advantage. Define the preferred technological vision and the path for its achievement in a sea of possibilities. Be the deciding voice in internal and external technical debates and disagreements. Guide the team to be focused and efficient in problem solving and research. Working together with the company's VP R&D to set the development targets, budget and plan. You will not be required to directly manage our employees.

Additional Requirements:

A full time job from our offices in Tirat Carmel. Proven experience as a CTO/CSO or similar scientific leadership role. PhD or MSc in chemistry or Chemical engineering or equivalent is an absolute must.
