

Student position – Job description

RepAir, an emerging start-up developing innovative carbon capture technologies to fight climate change, is expanding its R&D team in Yokneam, Israel.

We are looking for a talented and motivated **Chemistry/Materials Eng./Chemical Eng.** student to join our R&D team.

Key responsibilities include fabrication, characterization and testing of electrodes, to further advance our electrochemically-based technology.

Availability: 2-3 days per week, flexible during exams period.

Requirements:

- Excellent team player
- Self-learning capabilities
- Very good English
- Dynamic, curious by nature and driven for success

Advantages

- Strong hands-on lab experience
- Background/experience in electrochemistry
