

Chemical R&D Researcher for Psychedelic Medicine - Axecium Therapeutics

Axecium is an R&D company in the field of psychedelic medicine which focuses on treating psychiatric conditions such as treatment-resistant depression. Being part of the Segal Pharma Group, a leading group of companies in the fields of pharma and biotech (Panaxia, Luminera, and more), Axecium utilizes the group's vast experience in the development of pharmaceutical products for the design of innovative dosage forms that are tailored for optimal patient benefit.

Axecium is looking for a Chemical R&D Researcher to join the team at an early stage of our development process. As one of the first members of our R&D team, you will be in charge of projects from every aspect of the development process - from reviewing the literature and working with field experts to hands-on lab work such as the development of analytical methods and extraction protocols.

REQUIREMENTS

- MSc or PhD degree in chemistry / pharmacology / pharmaceutical engineering / biomedical engineering or similar
- At least 1 year experience in chemical R&D or analytical chemistry (industry or academia)
- Enthusiastic about research and problem solving
- Independent, creative, motivated, out of the box thinker
- Willing to work on multiple tasks in parallel in a rapidly changing environment
- A great team player
